

Transfer is used only at the highest resolution supported in the recipient

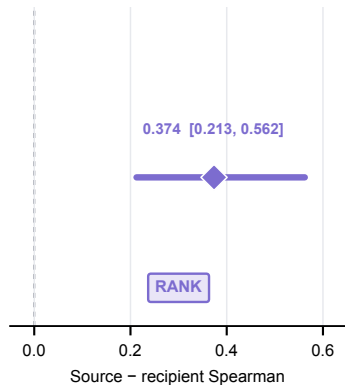

Points are estimates and horizontal lines are the reported 95% intervals; positive values favour transfer.

a Absolute-value transfer

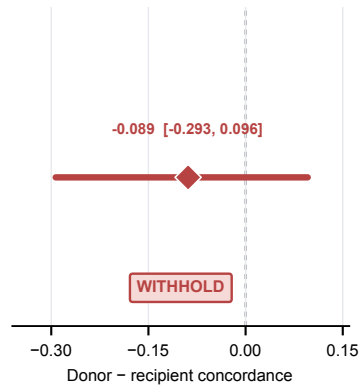

State coverage 100%
Full-relation support 60.8%
Chemistry-shuffled control passed

b Candidate-order transfer

Absolute RMSE gain -18.0%
Rank permutation Holm P = 0.00070
Top-quartile precision 0.932 vs 0.490

c Frozen second recipient

98 eligible pairs - P = 0.131
Precision 0.50 vs 0.50
Regret 0.563 vs 0.180
